

4. My responsibilities at Brookwood have included overseeing our performance of certain contracts with the United States Government, including contracts with various branches of the military. In some cases, Brookwood is the direct contracting party with the U.S. Government. More often, Brookwood serves as a sub-contractor providing fabrics that meet specifications established by the Federal government, and that are then used by Brookwood's direct customer to manufacture products (such as apparel) that are supplied to end users, such as the U.S. Military.

5. Through my responsibilities at Brookwood, I am familiar with Brookwood's performance as a sub-contractor under a certain government contract, Contract No. W911QY-07-D-0003, that was awarded to Atlantic Diving Supply, Inc. ("ADS") of Virginia Beach, VA effective December 20, 2006. A copy of the first page of a redacted form of the contract, as obtained from ADS, together with a relevant excerpt from the contract listing the clauses incorporated by reference in the contract (p. 57) are attached as Exhibit A.

6. The December 20, 2006 contract with ADS relates to the supply of protective outerwear referred to as the so-called "Gen III Extended Cold Weather Clothing System." The Gen III clothing "system" consists of a series of different "layers" of garments that may be used in different combinations, depending upon prevailing weather conditions. The various layers include typical outerwear, including a light jacket shell and trousers, as well as a heavy jacket and trousers.

7. On behalf of Brookwood, I served as a primary liaison to the government and to the sub-contractors that purchased fabrics from Brookwood to be manufactured into garments and sold to ADS as the primary contractor to the United States Army Soldier Center in Natick, Massachusetts under the referenced contract.

8. Part of the particular fabrics produced by Brookwood that I understand are involved in this dispute with Nextec are referred to as the so-called "Level V" and "Level VII" garments. The "Level V" garment is a soft shell jacket and trouser, while the "Level VII" garment is an extreme cold weather parka and trouser in which Brookwood's fabric was used as the face fabric and in the liner.

9. All of the fabrics produced by Brookwood and supplied for use in fabricating the Level V and Level VII garments were processed to meet particular government specifications under the referenced contract, and were delivered to subcontractors designated by ADS for fabrication into the protective outerwear requested by the U.S. Army Soldier Center in Natick, Massachusetts. Fabrics meeting these particular specifications have been sold by Brookwood for use only by the United States Government. Specifically, Brookwood made fabric shipments for this purpose to Proper International of St. Charles, MO under multiple purchase orders. Fabrics were also shipped to DJ Manufacturing Corp. of San Lorenzo, Puerto Rico; to Sterlingwear of Boston; to Wild Things of North Conway, New Hampshire; and to Creative Apparel of Belmont, Maine, all for use in manufacturing outerwear supplied to ADS for ultimate supply to the United States Military. The purchase orders we received from Proper International, for example, contain express references to the relevant contract number as reflected in the attached document which has been partially redacted to remove confidential information (see Exhibit B, Order No. 2029932 (5/31/07)).

10. As part of our performance as a sub-contractor under the government contract with ADS, Brookwood was required to perform certain standardized tests on its fabrics and to provide the results of those tests directly to the United States Army Soldier Center in Natick, MA (DD Form 1222). A representative example of a form supplied to the Soldier Center to

demonstrate compliance with the specifications established under the contract is attached as Exhibit C.

11. It is our understanding that the specific fabrics supplied by Brookwood conforming to the Level V and Level VII specifications, in response to purchase orders from the various sub-contractors under the ADS prime contract, have only been utilized in the manufacture of outerwear under the referenced contract. The fabrics were inspected and approved for use in performance of the contract by a designated government representative prior to shipment. It is also our understanding that the outerwear made from Brookwood's fabrics were also accepted by the United States Military.

12. Our understanding that the fabrics manufactured by Brookwood were actually used in satisfaction of the specified government contract is based on discussions with our direct customers during which we have informed them that these fabrics should only be used in furtherance of the referenced contract, and our further understanding that ADS also has an agreement or understanding with each of the manufacturers that all resulting garments are to be sold exclusively to ADS. In addition, we have an agreement with ADS that garments made from Brookwood supplied fabrics are to be used only in satisfaction of the relevant contract. We understand that ADS segregates the garments made from Brookwood fabrics from garments made from the fabrics of any other supplier in order to ensure that products made from our fabrics are only supplied in furtherance of the relevant contract.

I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct to the best of my knowledge, information and belief.

Dated: 6/25/08

I certify that the above test results were performed under my supervision in accordance with the specification test requirements and that the test results are true, valid and applicable to the supplies referenced. I further certify that these samples were the only samples tested from the lot of components identified above.

Signed: *[Signature]*

09/26/07

I certify that the samples tested above were randomly selected and represent the lot of components identified above and that the test results in this report are submitted as representing testing performed.
